Shower Door Maintenance

*** It is important to wait **24 hours** before using your unit to give the caulk time to set ***

Daily Maintenance-

1. At the end of every shower, we recommend using a squeegee, the same type that is used for cars, to wipe the glass. This will help prevent the build-up of soap scum and water marks.
2. Use only mild detergents on the glass. We recommend using Glass Plus, not Windex, because Windex contains a high amount of ammonia.
3. In addition to using a mild detergent, use a terry cloth towel to dry the shower enclosure.

Weekly Maintenance-

Use Comet Bathroom Spray cleaner or Scrubbing Bubbles weekly to deter the build-up of soap scum on the shower enclosure.

Remember never to use harsh abrasives such as Ajax, Comet powder, Soft Scrub, or CLR.

For owners who have invested in our optional sealants, all that is needed to maintain the glass is a splash of cool, clean water after each shower and a daily swipe with a squeegee. Every 1-2 weeks while taking a shower, use a nylon body scrubber and quickly remove any spots. It brings the sealed glass back to looking bright and new!

Thank you for your patronage, and as always, we appreciate your business.

Please call the CCS offices directly should you have questions or concerns at **(301) 473-5555**. Refills of Armor Wash or our TPC Surface Protector can also be purchased by calling this number.

Thanks!
